ANNUAL REPORT 2017-2018
Our mantra has always been: all development is local and women are the key to long term success as the health of a nation is determined by the health and parity of its women and girls.

- Diane Stern
S.O.U.L. Board Chair
S.O.U.L. Foundation fosters sustainable and vibrant Ugandan communities through unique partnerships focused on education, women’s empowerment, food security, and maternal health.
Dear Friends,

I would like to first express my deep appreciation for your continued and faithful support. We couldn’t do this without you! Thank you for standing with us and beside us.

As a new mom, I sometimes find myself imagining that I am a Ugandan woman, a new mother living in poverty with less than little to hope for. In that scenario I feel happy to have my new baby, but desperately afraid of what life will look like for her. I imagine what it feels like to be that mother, who lives without running water, electricity, or access to skilled reproductive health care. There’s no money, no safety nets, no voice, and no self-determination.

With that in mind, I go back to the birth of S.O.U.L. and how my core philosophy was conceived from a simple revelation: If we can’t really imagine or truly experience what it feels like to live in gripping poverty, why would we think we have all the answers? How can we impose solutions on something we haven’t lived, that we can’t imagine, and we don’t truly understand? No matter how hard I try to put myself in their shoes, I can’t fathom that stark reality for women in Uganda.

So, I started S.O.U.L. simply by listening to what the people in the village told me – and I kept listening for thirteen months. Little did I know at the time that we were a pioneer of the community led development model that is highly recognized today by the international development field. And with that revelation back in 2009, three core beliefs emerged: 1) People living in poverty possess the largest capacity to improve it. They are partners in development rather than passive recipients of aid. 2) Empowered individuals are emboldened to continue to find solutions that work. 3) As individuals become empowered, so do communities, capable of tackling systemic obstacles to progress in the long fight against poverty.

These core beliefs are our anchor to real transformative change and the tenets that guide our work every single day. And because of this, our communities are on the rise. They are collectively taking hold of their destiny and developing the systems necessary that promote life, health, and well-being. Now, they are able to stand alone and design their own future and livelihoods. Including our mothers, who are accessing the maternal health services and educational classes they need to have a safe and healthy pregnancy, childbirth, and beyond.

Nine years later, I stand in awe of how this model is transforming our community. Our early days were filled with excitement and joy, but more often it was hard, slow, and even painful at times. S.O.U.L. was truly built brick by brick. There were no quick fixes and it often seemed like we were moving through mud. Based on my current circumstance, I can’t help but make the comparison to childbirth, a joyful but painful and arduous experience, however one that yields an extraordinary outcome!

In the following pages, I know you will feel as proud as we do to see the progress that our community has made this past year. It’s a beautiful presentation that we are excited to share with you. Thank you.

With gratitude,

Brooke Stern Okoth
OUR MODEL

The greatest needs for women and youth in our Ugandan communities are opportunities to learn new skills, participate in the local economy, to access quality healthcare, and to receive a strong education. Through equitable partnerships with our community members, we design community-specific interventions and programs that build micro-economic models which are fully sustainable.

PROGRAM AREAS

EDUCATION

WOMEN’S EMPOWERMENT

FOOD SECURITY

MATERNAL HEALTH

WE BELIEVE...

Community transformation occurs when individuals are empowered to become agents of change in their own lives.
# Education

Providing Ugandan youth with opportunities to learn and thrive inside and out of the classroom

"I am currently studying for my Bachelor's of Medicine and Surgery. When I graduate, I will continue school to become a doctor with a focus on obstetrics and pediatrics. S.O.U.L.'s sponsorship program has offered me a gateway to becoming a doctor. Had it not been for S.O.U.L., I would not have had the opportunity to complete my secondary education and my current studies...My goal is to return to my village to practice what I have learned so that I can be a living example for the other youth in my community."

- Juma Odwori, S.O.U.L. Sponsored Student (pictured left, next to former sponsored student and medical doctor, Dan Muwanguzi)
S.O.U.L.'s Maternal Health Network is disrupting maternal and infant mortality in our rural communities by targeting the three delays in maternal health:

1. Education
2. Access
3. Services

"As a first time mother, everything was so new to me. Through the AEC classes, I was informed to start saving money and the importance of antenatal care for me and my baby. I am now confident and have a healthy baby."

- Birungi Mwasiti
AEC graduate

Empowering rural women with the education and tools necessary to have a safe and dignified childbirth

945 women and men graduated from the Antenatal Education Center (AEC)

2,283 women directly served by our antenatal classes and services

614 ultrasound scans
91,800 doses of prenatal vitamins
214 birthing kits provided to expecting mothers

100% of females surveyed from one AEC class reported a significant increase in their ability to care for their newborns after birth because of the classes
Since 2015, S.O.U.L. has targeted the first delay in maternal health by providing outstanding antenatal education and health services to mothers and their families in our rural communities.

S.O.U.L. has recently launched the Village Emergency Transport Systems (VETS) program to disrupt the second delay in maternal health, access to reaching care. Run by a network of community volunteers, VETS is providing expecting mothers with emergency transport to local referral hospitals.

Serving over 8,500 women from 40 rural villages, S.O.U.L.’s ambulance service is truly a lifeline for mothers and their babies.

Looking ahead to third stage of the Maternal Health Network, disrupting the delay in receiving proper care, S.O.U.L. is planning to construct a state-of-the-art community birthing center. Construction will begin in late 2019.

Each year in Uganda, 4,700 women die in childbirth, often from preventable causes.

Using community-led interventions to save the lives of mothers with obstetric emergencies and to help them deliver safely in a qualified birthing facility.
"To date, I have raised seven goats in total. I sold off four to pay for my child's school fees and I currently have three. Because of this program, I can manage to take my child to one of the most prestigious schools in Eastern Uganda. Had it not been for S.O.U.L I would not be able to support my child's education, which I know will help my child to have a better future."

- Babirye Mwiduma, Goat Cooperative Member
Transforming our communities through agriculture training, agribusiness, and increasing access to locally produced food

Skills we empower farmers with...
1. Climate-smart agriculture
2. Animal husbandry
3. Financial literacy
4. Entrepreneurship
5. Leadership

79 goats distributed and "passed on" through our goat cooperatives

242 farmers trained at our Agriculture & Livestock Learning Center

20,000 tilapia harvested per growing cycle through our four fish cages

75% of our farmers reported being better able to buy and produce more food for their household because of their training

15 local communities served by the maize mill and fish cage cooperatives

With 83% of Ugandans relying on subsistence agriculture, S.O.U.L. is equipping rural women farmers with the tools and resources to fight food insecurity, earn a stable income, and produce more food sustainably.
LOOKING AHEAD - 2018/19
Celebrating a decade of S.O.U.L.
and our community-led impact in Uganda

DESIGNING SYSTEMS THAT BUILD RESILIENT
AND VIBRANT COMMUNITIES

EDUCATION

Reaching over 3,000 students yearly with our holistic educational programs, equipping them for academic, career, and personal success.

WOMEN’S EMPOWERMENT

Increasing annual income for our women entrepreneurs by 150% while doubling the number of women participating in a group cooperative.

MATERNAL HEALTH

Reducing preventable maternal and neonatal mortality by 10% in our rural communities and serving over 5,000 women yearly.

FOOD SECURITY

Serving over 50,000 people through access to local foods provided by our women’s cooperatives and training over 500 farmers each year.

"As our women and youth rise, so do our communities, empowered to design their own future."
